DECLARATION OF CONFORMITY

in relation to

DIRECTIVE 2002/95/EC OF THE EUROPEAN PARLIAMENT
AND OF THE COUNCIL
OF 27 JANUARY 2003
ON THE RESTRICTION OF THE
USE OF CERTAIN HAZARDOUS SUBSTANCES (RoHS) IN
ELECTRICAL AND ELECTRONIC EQUIPMENT

Electromagnets

Lake Shore laboratory electromagnets are used to produce variable magnetic fields with a variety of air gap and pole cap configurations. They are ideally suited for integration into custom designed magnetic test platforms for applications including, but not limited to, magneto-optical studies, in-line annealing, Hall effect studies, susceptibility measurements, spin magnetic resonance, and biological studies.

The equipment detailed above is classified as category 9 equipment 'Monitoring and control instruments' as defined within Directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE). As such, the equipment falls outside the scope of Directive 2002/96/EC on the Restriction of the use of certain Hazardous Substances (RoHS) and may legitimately contain substances restricted by Article 4.1 of Directive 2002/95/EC within each homogeneous element above the maximum concentration values defined within Commission Decision 2005/618/EC.
