

DECLARATION OF CONFORMITY

in relation to

DIRECTIVE 2002/95/EC OF THE EUROPEAN PARLIAMENT
AND OF THE COUNCIL
OF 27 JANUARY 2003
ON THE RESTRICTION OF THE
USE OF CERTAIN HAZARDOUS SUBSTANCES (RoHS) IN
ELECTRICAL AND ELECTRONIC EQUIPMENT

Hall Effect Measurement Systems (HMS)

Lake Shore Hall Effect Measurement Systems (HMS) are primarily sold to universities, government labs, and industry for research applications. They are used to characterize physical properties in semiconductors, as well as other electronic materials including magnetoresistors, multilayer magnetic films, dilute magnetic semiconductors, superconductors, and spintronics devices.

The equipment detailed above is classified as category 9 equipment 'Monitoring and control instruments' as defined within Directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE). As such, the equipment falls outside the scope of Directive 2002/96/EC on the Restriction of the use of certain Hazardous Substances (RoHS) and may legitimately contain substances restricted by Article 4.1 of Directive 2002/95/EC within each homogeneous element above the maximum concentration values defined within Commission Decision 2005/618/EC.

On behalf of Lake Shore: Karen E Lint
