

DECLARATION OF CONFORMITY

in relation to

DIRECTIVE 2002/95/EC OF THE EUROPEAN PARLIAMENT
AND OF THE COUNCIL
OF 27 JANUARY 2003
ON THE RESTRICTION OF THE
USE OF CERTAIN HAZARDOUS SUBSTANCES (RoHS) IN
ELECTRICAL AND ELECTRONIC EQUIPMENT

Coils

Two series of Lake Shore Helmholtz coils are available: Moment and Field. The Moment (M) series is used in conjunction with a fluxmeter to measure magnetic moment for the inspection and research of magnets. The Field (F) series is used to generate low magnetic fields for studying the properties of magnetic materials, or for use as a standard field coil.

The equipment detailed above falls outside the scope of the Directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE) and Directive 2002/95/EC on the Restriction of the use of certain Hazardous Substances (RoHS) as they constitute a 'component' element, which is not discernable electrical and electronic equipment (EEE) or finished goods. As such, it may legitimately contain substances restricted by Article 4.1 of Directive 2002/95/EC within each homogeneous element above the maximum concentration values defined within Commission Decision 2005/618/EC.
