Model 460 3-Channel Gaussmeter

Model 460 features
- Displays each axis simultaneously
- Vector magnitude reading
- Resolution to 5¾ digits (1 part out of ±3000,000)
- Accuracy to ±0.10% of reading
- Peak capture
- Analog voltage outputs
- IEEE-488 and serial interface
- Can be operated with three individual probes, a single 2-axis probe and one individual probe, or a single 3-axis probe
Introduction

The Model 460 3-channel Hall effect gaussmeter is the best choice for applications requiring 3-axis measurements or three simultaneous single axis measurements. The Model 460 combines the performance of three gaussmeters into one package, making it an excellent value for materials analysis and field mapping applications. The large vacuum fluorescent display shows readings for all three channels simultaneously as well as vector magnitude or differential readings. The full-function keypad provides easy access to measurement features.

Measurement modes

The Model 460 operates in DC, RMS, and Peak modes, with superior accuracy and resolution in DC measurement mode. Measurements to 5¾ digits are possible due to the low noise floor. With low noise and high stability, the Model 460 is ideal for multiple-axis field mapping applications. Changing fields that are often used in material analysis systems can be measured on all three inputs up to 18 times per second over the computer interface, with excellent resolution.

Best suited for fringe field measurements or measurement of magnets and solenoids driven at line frequency, RMS mode measures periodic AC fields from 10 Hz to 400 Hz. Instrument circuitry accommodates wave forms with crest factors up to 7, with true RMS conversion.

Peak circuitry in the Model 460 captures single event peaks or monitors the peak amplitude of periodic wave forms from 10 Hz to 400 Hz, with reproducible single peak measurements down to 5 ms rise time. Instrument software accommodates indefinite hold time with no decay. The Model 475 DSP gaussmeter is a good choice if faster peak or RMS measurements are required.

Range and resolution

When used with appropriate probes, the Model 460 3-channel gaussmeter offers full scale ranges from 300 mG to 300 kG. A different range can be used with each input. With 5¾-digit resolution, DC field variations approaching 0.010 mG can be detected; in larger DC fields, resolution to one part in 300,000 is possible. For RMS and Peak measurement, resolution is 4¾ digits or one part in 30,000 because in these modes environmental noise is more difficult to separate from the desired signal. The filter feature of the Model 460 improves resolution in noisy environments by taking a running average of field readings. DC mode requires filtering to achieve 5¾-digit resolution.

Display and interface features

The Model 460 has a 4-line by 20-character vacuum fluorescent display. During normal operation, the display is used to report field readings and give results of other features such as max/min or relative. When setting instrument parameters, the display gives the operator meaningful prompts and feedback to simplify operation. The operator can also control display brightness.

Following are four examples of the various display configurations:

Normal reading—the display configured to show the live DC field readings for the X, Y, and Z axis, as well as the vector magnitude

Max DC hold on—the display configured to show the live DC field readings for the X, Y, and Z axis, as well as the maximum field reading (settable to any axis)

Differential reading—the display configured to show the live DC field readings for the X and Y axis, as well as the X-Y axis differential reading

3 separate probe readings on—the display configured to show the X, Y, and Z axis as three separate gaussmeters: the X axis as a DC field reading with audible and visual alarm, the Y axis as an RMS field value, and the Z axis as a peak field value.
## Model 460 specifications

### General measurement
- **Number of inputs:** 3
- **Update rate:** Up to 4 rdg/s on display; up to 18 rdg/s with IEEE-488 interface
- **Measurement modes:** DC, RMS, Peak
- **Probe compatibility:** Standard, multi-axis, and custom probes
- **Probe features:** Linearity Correction, Temperature Correction, Auto Probe Zero
- **Measurement features:** Autorange, Max Hold, Relative Mode, Filter, Vector Magnitude, Differential Reading
- **Probe connector:** 15-pin D style

### DC measurement

</table>

- **AC frequency range:** 10 Hz to 400 Hz
- **AC RMS accuracy:** ±2% of reading (50 Hz to 60 Hz)
- **AC RMS frequency response:** 0 to -3.5% of reading (10 Hz to 400 Hz)
- **AC peak accuracy:** ±5% typical
- **AC peak speed:** 5 ms for single peak

### Front panel
- **Display type:** 4-line × 20-character, vacuum fluorescent
- **Display resolution:** Up to ±5½ digits
- **Display update rate:** 4 rdg/s with vector off, 3 rdg/s with vector on
- **Displays units:** Gauss (G), Tesla (T)
- **Units multipliers:** µ, m, k
- **Annunciators:** RMS: AC input signal, DC: DC input signal, MAX: max hold value, s: relative reading, R: remote operation, : alarm on
- **Keypad:** 25 full-travel keys
- **Front panel features:** Display prompts, front panel lockout, brightness control

### Interfaces
- **RS-232C capabilities**
  - **Baud:** 300, 1200, 9600
  - **Connector:** RJ-11 configuration
  - **Update rate:** Up to 14 rdg/s at 9600 baud
- **IEEE-488 capabilities**
  - **Complies with IEEE-488.2 SH1, AH1, RL1, P0, DC1, DT0, CO, E1**
  - **Update rate:** 18 rdg/s with vector off, 14 rdg/s with vector on
- **Alarm**
  - **Settings:** High and low setpoint, inside/outside, audible
  - **Actuators:** Display annunciator, beeper
- **Monitor analog output (3)**
  - **Configuration:** Real time analog voltage output
  - **Scale:** ±3 V = ±full scale on selected range
  - **Frequency response:** DC to 400 Hz
  - **Accuracy:** Probe dependent
- **Corrected analog output (1)**
  - **Configuration:** Voltage output generated by DAC
  - **Range:** ±3 V, ±10 V for the Model 460-10
  - **Scale:** User-defined
  - **Resolution:** 0.366 mV of ±3 V
  - **Update rate:** Same as field measurement
  - **Accuracy:** ±3.1% full scale in addition to measurement error
  - **Minimum load resistance:** 1 kΩ (short circuit protected)
  - **Connector:** BNC

### General
- **Ambient temperature:** 15 to 35 °C at rated accuracy; 5 to 40 °C with reduced accuracy
- **Power requirement:** 100, 120, 220, 240 VAC (+5%, -10%), 50 or 60 Hz, 40 VA
- **Size:** 432 mm W × 89 mm H × 368 mm D (17 in × 3.5 in × 14.5 in), full rack
- **Weight:** 7.5 kg (16.5 lb)

Probes and sensors

Lake Shore offers an extensive line of single, two-, and three-axis probes, standard Hall sensors, and probe accessories. Lake Shore probes are factory calibrated for accuracy and interchangeability. Factory-calibrated probes feature a PROM in the probe connector so that calibration data can be read automatically by the instrument. If the probe is equipped with a temperature sensor, the Model 460 reads both temperature and field signal and continuously adjusts the calculated field value. The customer can also download sensitivity for discrete Hall sensors. In addition, Lake Shore can custom design probes and assemblies to meet specific application needs.

Please indicate your power/cord configuration:

- 1 | 100 V—U.S. cord (NEMA 5-15)
- 2 | 120 V—U.S. cord (NEMA 5-15)
- 3 | 220 V—Euro cord (CEE 717)
- 4 | 240 V—Euro cord (CEE 717)
- 5 | 240 V—U.K. cord (BS 1363)
- 6 | 240 V—Swiss cord (SEV 1011)
- 7 | 220 V—China cord (GB 1002)

Accessories included

- 4060 Zero gauss chamber
- 119-012 Model 460 user manual

Accessories available—also see Gaussmeter Accessories section

- 4001 RJ-11 4-wire cable assembly used with RS-232C interface—cable is 4.3 m (14 ft) long
- 4002 RJ-11 to DB-25 adapter—connects computer to RS-232C port
- 4003 RJ-11 to DE-9 adapter—connects computer to RS-232C port
- 4004 IEEE-488 interface cable connects customer-supplied computer to IEEE-488 interface—cable is 1 m (3.3 ft) long
- CAL-460-CERT Instrument recalibration with certificate
- CAL-460-DATA Instrument recalibration with certificate and data
- CAL-NEW-DATA New instrument calibration with certificate and data
- RM-1 Rack mounting shelf to attach one Model 460 gaussmeter to a 483 mm (19 in) rack mount space
