

DECLARATION OF CONFORMITY

in relation to

DIRECTIVE 2002/95/EC OF THE EUROPEAN PARLIAMENT
AND OF THE COUNCIL
OF 27 JANUARY 2003
ON THE RESTRICTION OF THE
USE OF CERTAIN HAZARDOUS SUBSTANCES (RoHS) IN
ELECTRICAL AND ELECTRONIC EQUIPMENT

Temperature Controllers

Lake Shore temperature controllers are used primary by researchers and scientists who are studying the physical properties of materials at very low temperatures. Lake Shore Temperature controllers are capable of monitoring and controlling temperatures from <50 mK to 1505 K. Applications include, but are not limited to, integration into systems for metrology, condensed matter physics, materials research, controlling cryo-coolers, and controlling dilution refrigerators.

The equipment detailed above is classified as category 9 equipment 'Monitoring and control instruments' as defined within Directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE). As such, the equipment falls outside the scope of Directive 2002/96/EC on the Restriction of the use of certain Hazardous Substances (RoHS) and may legitimately contain substances restricted by Article 4.1 of Directive 2002/95/EC within each homogeneous element above the maximum concentration values defined within Commission Decision 2005/618/EC.
